10	Introduction, Sample Depths, Page 4 of 11, second paragraph	Comment 10, Introduction, Sample Depths, Page 4, second paragraph – Edits made in response to this comment include the following sentence: "The surface sediment sample will be collected at a location as close as possible to the armor layer SPME (outside the area of the 4- inch diameter metal plate used for re-locating the SPME samplers), but no more than 8 inches from the armor layer SPME location." Response to comments mentions samples in plural form. Please revise accordingly.	The requested edit has been made. In addition to making the sentence grammatically correct, other words in the sentence were pluralized.
20	QAPP Worksheet #11 (UFP-QAPP Manual Section 2.6.1) Project Quality Objectives/ Systematic Planning Process Statements, Decision Statements, Page 8 of 15	Comment 20, QAPP Worksheet #11 (UFP- QAPP Manual Section 2.6.1) Project Quality Objectives/Systematic Planning Process Statements, Decision Statements, Page 8 – EPA's comment requested the sentence to read "If COPCs are not detected in the porewater within the cap active layer and the cap armor layer, then the CapSim modeling results are supported at this time. EPA will determine the frequency of further data collection efforts after review of the data obtained as part of this QAPP, and with consideration of the 17-mile RI/FS." CPG's comment response says the change has been made but the text reads "If COPCs are not detected in the porewater within the cap active layer and the cap armor layer, then the CapSim modeling results are confirmed." Please include the following language from EPA's comment in the revised text: "modeling results are supported at this time"	The requested edit has been made.
